

JOICY ROSLIN S

AI/ML Fresher | Python Developer | Generative AI Enthusiast
Hyderabad, India | joicyroslin@gmail.com | github.com/joicyroslin-svg | linkedin.com/in/your-linked-in

PROFILE SUMMARY

Motivated AI/ML fresher with strong interest in building real-world machine learning, computer vision, and generative AI projects. Comfortable with Python, data preprocessing, model training basics, and GitHub-based project development. Seeking an AI/ML internship to apply technical skills, learn from industry teams, and contribute to impactful products.

TECHNICAL SKILLS

Languages	Python, SQL, Basic HTML/CSS
AI/ML	Machine Learning, Data Preprocessing, Classification, Regression, Model Evaluation
Libraries	NumPy, Pandas, Matplotlib, Scikit-learn, OpenCV, Streamlit
Generative AI	Prompt Engineering, LLM Basics, RAG Basics, AI Agents Concepts
Tools	Git, GitHub, VS Code, Jupyter Notebook, Google Colab

PROJECTS

AI Resume Intelligence Platform

Python | NLP | Streamlit | Machine Learning

- Built a resume analysis platform that checks resume content, extracts important sections, and gives improvement suggestions.
- Implemented text cleaning, keyword matching, score generation, and user-friendly result display.
- Designed the project for students and freshers to improve ATS-readiness and internship applications.

AetherTouch AI - Gesture-Based Drawing Assistant

Python | OpenCV | MediaPipe | Computer Vision

- Created a hand-gesture controlled drawing system using webcam-based hand tracking.
- Added drawing tools such as brush, color selection, erase mode, canvas controls, and gesture actions.
- Focused on accessibility and touch-free interaction for creative and presentation use cases.

Bank Marketing Prediction Model

Python | Pandas | Scikit-learn | Classification

- Processed real-world customer data and trained a classification model to predict marketing campaign response.
- Handled categorical features, train-test split, model evaluation, and result interpretation.

EXPERIENCE

Machine Learning Intern - SkillCraft Technologies

May 2026 - Present

- Working on beginner-to-intermediate machine learning tasks and building portfolio-ready projects.
- Practicing clean code, GitHub documentation, experiment tracking, and project presentation.

OPEN SOURCE & PROGRAMS

- Contributor - GirlScript Summer of Code 2026 (GSSoC'26), AI Agent Track
- Contributor - Nexus Spring of Code 2026
- Contributor - Social Summer of Code Season 5

EDUCATION

Bachelor of Technology / Degree - Your College Name

Expected Graduation: 2027/2028 | Hyderabad, India

- Relevant subjects: Data Structures, Python Programming, Machine Learning, Database Management Systems

CERTIFICATIONS

- Google Cloud Gen AI Academy - APAC Edition
- Machine Learning / Python / AI Certificates - Add certificate platform names here

ACHIEVEMENTS

- Selected for multiple open-source programs and actively building AI/ML projects on GitHub.
- Built and documented projects focused on real-world student and accessibility use cases.
